Generating Trust and Making Us Stand Out

Over the last few years, **Panda Security has designed a visionary strategy that has resulted in the reinvention of the traditional models of cyber-defense.**

A disruptive model based on monitoring, registering and classifying absolutely every active process on every computer on the corporate network, that is being rewarded by the market with an exponential growth in market share, by analysts with their express recognition and positioning on comparatives, and by public institutions with **the numerous official certifications that it is receiving.**

These endorsements certify a guarantee of proven trust and security, and allow **Panda Security and its solutions to be fully aligned with the proposals of the European Parliament** approved in motion A8-0189/2018, positioning them as perfect candidates to access the Plan for the European Cybersecurity Certification.

Official Certification

Its solution, **Panda Adaptive Defense** is the only EDR solution endorsed by these three certifications:

Common Criteria "EAL2" Certification for Information Technology Security Evaluation. This certificate is recognized by all worldwide certificate authorizing members such as NIAP and NSA from the USA, NCSC from the UK, BSI from Germany or CNI and CCN from Spain."

+ info

Qualified IT Security Product by the Spanish Cryptology Center.

+ info

High "ENS" Classification by National Security Framework.

+ info

Panda Security is established as the leading **European EDR vendor,** with fully European shareholders, headquarters, technology and cloud servers.

Our Latest Awards

Gartner

Gartner, in their latest **Magic Quadrant (MQ)** for Enpoint Protection Platforms (EPP), published in 2018, names **Panda Security as a visionary in this market.**

The security solution and flagship of Panda Security, **Panda Adaptive Defense 360,** combines Endpoint Protection (EPP) with Endpoint Detection and Response (EDR) capabilities, in a single security solution, with a unique lightweight agent.

The solution provides the highest levels of preventative Protection, advanced threat detection, Forensic Analysis and response, drastically reducing the attack surface for all kinds of malware, and fileless and malwareless attacks.
